

☒ Expat Living Oct 2011 Feature:

One of the 70 photographs we showed this client for their family shoot at the Botanic Gardens, I feel that this image really captured their daughter's spirited personality, and I can hear her laughter as well as theirs through the photograph. For me as a photographer, that is the perfect image I love creating for my clients. We like to create beautiful photographs in the most natural poses, be they portraits of families, newborns, children, pets, glamorous individuals, couples or even serious corporate shots. Our sessions are always fun and full of laughter and action. We try to make ourselves family with the people we are shooting to make everyone comfortable and bring out the best of their inner selves.
