Colour coordination is an important aspect of portraiture, especially for group photo sessions. As a general rule, earthy, neutral, and pastel colours work best together.

By picking the right patterns and tones, you can let the personalities of each person shine through. If you want to keep it simple, here are some tried and tested options!

# CLASSIC NEUTRALS

A white top paired with dark-coloured bottoms is a timeless combination that will never go out of style for every couple. This is the perfect casual outfit that anyone can easily pull off no matter the occasion!

# WHAT TO WEAR

**Key tip:** Both of you can wear a mix of secondary colours to keep it visually interesting.

Pair soft pinks or lavender with browns/grey, or similar pastel shades of various textures.

Mixing different colours will work if the tones are muted and soft. You will complement each other perfectly and look cohesive, which is exactly the effect you want when taking a couple portrait.

# COLOURFUL & CHIC

Colours are loads of fun. Just take care with how you mix and match!

Muted colours are fail-proof options and give a softer feel to portraits. Think pastels, earthy brick red, mustard yellow, light olive green, sky blue, instead of strong solid colours.

# WHAT TO WEAR

## PRETTY IN PERANAKAN

Celebrate your love in style! Textured cheongsams and batik prints bring the perfect balance of tradition and elegance to a couple photoshoot — just look at these photos!

Did you also know that we are the first photo studio in Singapore to create a unique Peranakan concept?

## SMART & SHARP

For the gentlemen, a suit or shirt and pants combination is the best way to look sharp and smart. You can also bring a tie or bow tie to go along with the formal look. The clean, unbroken lines of a well-fitted suit will create a silhouette that is pleasing to the eye.

As for the ladies, a fine evening dress with some texture will show up beautifully and accentuate your physique on camera.

When choosing and planning pieces to wear, a good tip is to pick something that isn't too loose or hugs your body too tight. You'll feel more comfortable, and also look extra flattering in your pictures!

## WHAT TO WEAR

# NOT WHAT TO WEAR

There are no hard rules on what not to wear, but here are some tried and tested tips to make sure the photoshoot meets your expectations.

Generally, it's better to stay away from:

- Polo shirts and hoodies
- Checkered patterns
- Neon colours
- Loud, big logos
- Large floral patterns
- Shiny, reflective textures
- Too many accessories
- Spectacles with tinted or transition lenses
- Clothes with large fonts or graphics
- Clothes that are too loose, too tight or too thick
- Colourful undergarments (nude tones are best)

We recommend you to pick outfits in colours that complement your skin tone. Pastel colours like lilac or richer, warmer colours will go well with darker complexions.

Lighter, cooler skin tones will suit colours that bring contrast, such as jewel colours (a saturated red, blue, green, yellow).

## FOOTWEAR

Appropriate shoes for each outfit are very important, especially during a photoshoot! Footwear can make or break an outfit and it is also the quickest way to make an impression.

As a rule of thumb, avoid open-toe footwear such as slippers or sandals. Go for **dress shoes, sneakers, or boots**.

Remember, it depends on the *theme* as well. Sneakers are the default choices for casual streetwear, while heels and a nice pair of loafers/oxfords are preferred for smart casual and formal occasions. **Comfort is key** — your shoes should not hurt too much!

For the gentlemen, always **match your socks** with your shoes! High socks with a suit is most presentable.

Ladies — heels can **change your height** when you pose with your partner. Do wear something you can easily remove and put on if need be.

## HAIR & MAKEUP

The right makeup can help to enhance your features and create a confident yet sophisticated look. Ladies should have some light makeup on — nothing too dramatic!

The focus of a portrait is often the **eyes**, so any eye makeup should be applied delicately. Neutral colours will work best. A rich lip colour can also spice up your look!

Let's talk about **hair** — for ladies with more length, a gentle blowout will add some volume to your hair. If you have short hair, take the time to comb and style it, keeping any flyaways in place.

For the gentlemen, you can use products like hair gel or hair spray to create a neat and polished appearance.
